Reasons for Allowance

Claim 1 is allowed.

It is noted that the closest prior art of record, Prieto, Jr. (U.S. Patent 5,907,822), that when a frame is missing, encodes previously decoded speech parameters to update the decoder state and replace the missing frame, but Prieto, Jr. does not first synthesize a speech signal corresponding to an unavailable packet and then encode the synthesized speech to provide signals to the decoder to maintain the state of the information in the decoder. Thus, independent claim 1 is allowable over the prior art of record because the cited prior art alone or in combination, does not fairly suggest or disclose the claimed combination of features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement for Reasons of Allowance."

Double Patenting

The provisional double patenting rejection has been removed in view of the final claim language of application 09/700524 at the time of allowance.
